

## **Galvanized Pressed Steel Door Frame**

A Galvanized Pressed Steel Door Frame is a strong, corrosion-resistant frame made from pressed galvanized steel, ideal for durable and long-lasting door installations in industrial, commercial, and residential settings.

### **Powder-Coated Door Frame and Window**

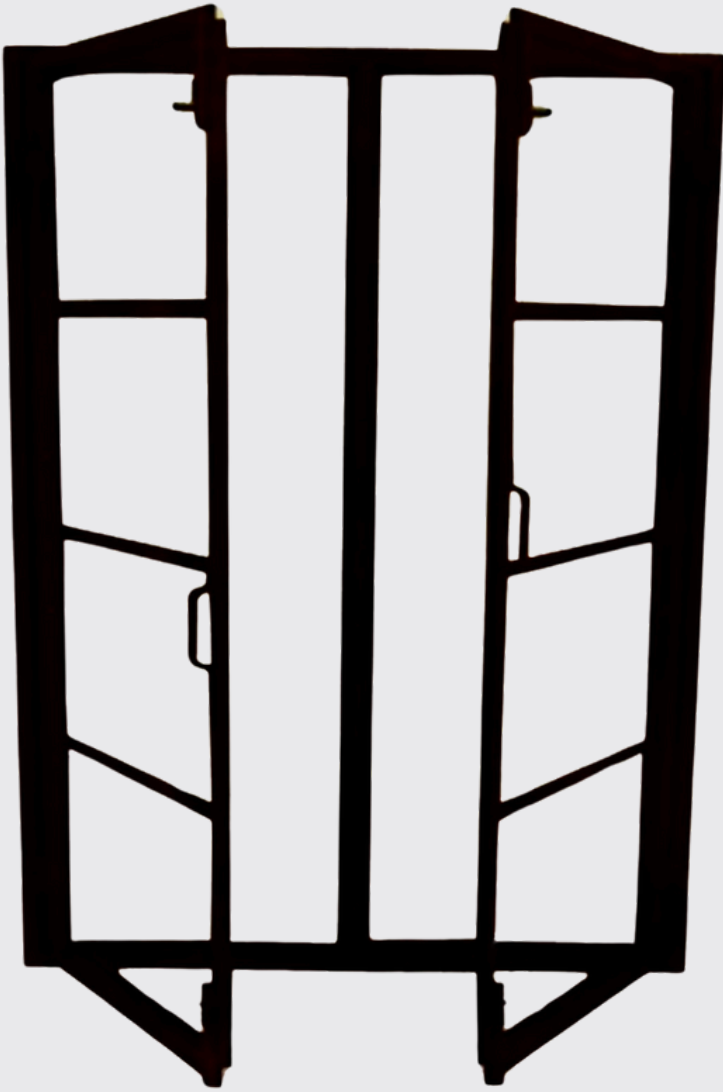

A Powder-Coated Door Frame and Window are made from metal with a durable, electrostatically applied powder coating. This finish enhances corrosion resistance, durability, and aesthetics while requiring minimal maintenance. They are ideal for residential, commercial, and industrial applications, offering a sleek and long-lasting finish.

### **Pressed Steel Door Frame (Red Oxide)**

A Pressed Steel Door Frame (Red Oxide) is a durable frame made from pressed steel sheets and coated with red oxide primer for rust resistance. It is commonly used in industrial, commercial, and residential buildings for strength and longevity.

A Door Frame Cum Window (Red Oxide) is a combination of a door frame and window, both coated with red oxide primer to prevent corrosion. This setup provides a strong, durable

## **Z Section Window**

A Z Section Window is a type of steel window frame designed in a “Z” shape for enhanced strength and durability. Commonly used in industrial and residential buildings, it provides excellent support for glass panels while ensuring structural stability. The Z-section design allows for easy installation, weather resistance, and a sleek appearance. It is often coated with red oxide or powder coating for corrosion protection.

# Multi-Colour Door Frame and FHC Door

A Multi-Colour Door Frame and FHC Door combine durability with aesthetics. The multi-colour door frame features a vibrant, powder-coated or painted finish, enhancing visual appeal while providing corrosion resistance. The FHC Door (Fire-Resistant, High-Security, and Corrosion-Resistant) offers superior protection against fire, harsh weather, and physical impact. Together, they create a stylish yet highly durable solution for residential, commercial, and industrial applications.

## Pressed Steel Window

This is a Pressed Steel Window with Red Oxide Primer. It features a sturdy steel frame with horizontal bars for security and an integrated mesh for ventilation and insect protection. The red oxide coating provides corrosion resistance and serves as a base for further painting. This type of window is commonly used in residential, industrial, and commercial buildings for durability and security.
